

Your Information Security Partner

About Us

InfoSec Governance

InfoSec Governance helps to educate and protect businesses from cyber security-related threats. We are a company that puts the customer first and works with you to achieve the goal of securing your business. We specialise in providing Cyber Essentials and IASME Cyber Assurance certifications, providing penetration testing as well as managed services such as virtual CISO, vulnerability scanning and security awareness phishing campaigns.

InfoSec Governance help businesses protect themselves from cyber based threats. We provide helpful friendly advice and services to businesses and listen to their requirements.

Our Core Values

Our mission is to provide services which allow our clients to reduce their risk to information security and ensure that our clients can obtain successful and measurable business valued outcomes.

Why are our values important? Our company values define who we are, they guide our behaviour and define how we interact with our customers, partners, and suppliers. Our company values allow us to make decisions on what we do within the business and how we work with you, our customer, as well as our suppliers, and partners.

Our values form the foundation of everything that InfoSec Governance do and every action that we take within the business.

- To build valued, long term relationships

Our Team

Marcus Dempsey

Marcus is an experienced technical manager who has 30 years of knowledge in IT & cyber security.

Marcus has been a Cyber Essentials assessor for over 6 years and has worked with companies of all sizes.

His aim was to put the customer first and to help secure business of all shapes and sizes

Bryan Holmes

Bryan has spent more than 30 years working in various IT environments with a wealth of experience in infrastructure, storage and security.

Building, running and protecting infrastructure of all shapes and sizes.

He is well placed to advise customers on infrastructure security

Our Services

Cyber Essentials is a government backed certification that helps you demonstrate your commitment to cyber security, protecting your users data and is managed by the National Cyber Security Centre. The scheme has been designed to be a simple, but yet effective way to help protect your business against the most common cyber threats.

InfoSec Governance are an approved Certification Body for the certification of Cyber Essentials & Cyber Essential Plus we can help through each step of the process or simply audit and certify your certification request.

Business systems connected to the Internet and the ever-increasing news about companies having their data breached, it's only a matter of time until your business assets are targeted.

Network penetration testing is used to identify existing risks and cyber security-related vulnerabilities, you need to bring in an expert. Our bespoke approach blends a mixture of technical and social assessments to give businesses a true understanding of their cyber risk.

The IASME Cyber Assurance Standard, previously known as the IASME Governance Standard, is a risk based information security framework which has been developed for small and medium businesses. The standard is also based around risk and asset management, Cyber Essentials privacy and data protection.

The Standard has been developed to not only help businesses work to protect themselves, but is also mapped against ISO 27001 to help businesses adhere to industry best practices.

A virtual CISO (Chief Information Security Officer) is a senior-level executive within the business who is responsible for establishing and maintaining the enterprise vision, strategy and program to ensure information assets and technologies are adequately protected. The virtual CISO service which is offered by InfoSec Governance has been designed to fill that skill gap. A remote virtual CISO service means that you will receive a board-level resource that can sit within your business virtually.

Partner With Us

Why partner with us?

The simple answer is InfoSec Governance can help work with you and your customers quickly and easily and we have a reputation for great pricing, support and service delivery that is second to none. By partnering with us we can help you expand your service offering, increase your margins and have a competitive edge over your competition.

We offer the following as standard:

Pricing

We offer pricing that will allow you to make additional margin on the selling of services to your customers.

Provisioning

We will work with you to ensure that everything is provisioned accordingly and runs as smooth as possible.

Service

Our services are designed to help your customers stay safe against cyber related threats. Depending upon the service offering, some of these can be white labelled.

WHITE LABEL

We will provide the solutions you need at rates that you can afford, which you can rebrand (dependent upon service) and resell to your clients at your own price offering.

ALLIANCE

We can act as technical support and work hand-in-hand with you to design and deliver security based solutions to your client. We bill the end user with your commission included which will be paid on a monthly recurring basis after we have received payment from the client.

REFERRAL

We offer a simple referral model where you send opportunities our way and we do the rest, paying you a commission rate of 10% on any successful deals.

Our Certifications

Testimonials

Kromek has worked with InfoSec Governance for a number of years now, more recently to guide us in the process of moving from the standard Cyber Essentials to the Cyber Essentials Plus certification. Marcus has a wealth of knowledge and used this to ensure we were 100% ready for our assessment.

Stefan Knowles

We've worked with Marcus at InfoSec Governance for a few years now to help us achieve our Cyber Essentials and Cyber Essentials Plus Certifications. He's has been absolutely professional and helpful in helping us remediate issues and generally just a great bloke!

Adrian Trueman

It was a pleasure to work with Marcus at InfoSec Governance throughout our Cyber Essentials Plus audit. He quickly clarified any issues we had before the audit providing timely advice and support. He was also very patient with colleagues during the audit itself whilst gathering the required evidence.

Simon Bennett

Marcus and the team at InfoSec Governance were great when we came to renew our Cyber Essentials certification this year. They were quick to respond, flexible about helping us remotely and professional from start to finish.

Richard Merrygold

Another responsive, quality and professional service from the team at InfoSec Governance. In a constant rapidly changing sector, it's always reassuring to deal with experts in their field with the ability to action Cyber Security requirements quickly and proficiently.

Steve Hughes

Marcus is very supportive and has helped us maintain our Cyber Essentials certification for another year. He's approachable and responsive. We would recommend him without hesitation.

Nikki Kelso
